

Gitkraken - Filter all commits by author

Asked 8 months ago Viewed 764 times

I am trying to filter all the commits done by an user. Right now it just go to specific commit.

2

This feature I found in source tree but couldn't find the same in gitkraken.

git

github

client

gitkraken

- 2 gitkraken (v4.1.1) does have a feature to search by author name . Click on Search Commits and just type in the author name. – [clmno](#) Nov 16 '18 at 4:25

You might like to check out Git Extensions (Windows only). GitKraken is great at 2am with its dark theme, but the feature set is pretty light. gitextensions.github.io. I've literally used a dozen clients...and Git Extensions is head and shoulders above anything else I've used for performance and features. – [Damien Sawyer](#) Feb 24 at 21:02

Is this question similar to what you get asked at work? [Learn more](#) about asking and sharing private information with your coworkers using Stack Overflow for Teams.
